

Moonshiner is looking for

Senior Javascript Developer (f/m)

About us:

Moonshiner is a software architecture and programming agency that enables organizational change through technological innovation. We are an award-winning Austrian company fascinated by all things digital, altering how enterprises organize their IT through a hands-on mentality and a continued focus on results.

We are currently looking for a **Senior Javascript Developer** who appreciates the amazing possibilities technology has to offer.

About the job:

Responsibilities we trust you with:

- the ability to work independently as well as in a team as part of our fast-paced agile processes
- experience in unit tests and the creation of bug reports
- participation in release processes
- high personal coding and development standards (peer review, unit testing, documentation, etc.)

Your experience includes/ Qualifications:

- A deep knowledge of web development technologies
- extensive experience with JavaScript (ES6 Syntax is known, DOM is understood)
- ReactJS, VueJS or other component-based libraries are welcome
- solid grasp of HTML5, CSS3
- experience in frontend frameworks such as Bootstrap and knowledge of their limits
- practical understanding of security and performance of web applications

What you can expect from us:

- Starting salary of EUR 47.000,00 with the possibility of overpayment depending on experience
- An office in the heart of Vienna
- dynamic teams full of motivated people from various backgrounds
- a collaborative atmosphere with creative freedom
- a flat organisational hierarchy
- weekly get-togethers for lunch
- comfortable collaboration spaces with couches, snacks, and beverages

Ready to become part of the team?
We can't wait to hear from you!
