

VelaLabs is an innovative international analytical service provider for the pharma- and biotech-industry with a focus on development and characterization of Biologics, Biopharmaceuticals and Biosimilars.

We are looking for an employee to reinforce our team: **Subject Matter Expert**

Focus: HPLC methods

Responsibilities:

- Plan & evaluate experiments
- Technical project lead
- Communication of technical topics to clients
- Technical feasibility studies for new projects
- Review of reports / plans / lab journals
- Training of lab-technicians
- Support troubleshooting / change control / deviations / validations

Requirements:

- Enjoys fast-paced diverse scientific work
- Loves to communicate issues and offer solutions
- In-depth understanding of HPLC in theory and practical application
- Fast learner
- Self-organized, open minded
- Positive attitude
- Previous experience in protein- or chemical analytics
- Business English and German, spoken and written

Bonus:

- GMP experience
- Data evaluation / statistics skills
- Programming skills

What you can expect:

- Diverse creative environment and problem solving atmosphere with a highly motivated team of junior staff.
- Flexible working time in laboratories, equipped with state of the art analysis instruments.
- Parking place in front of the company.

We offer an interesting and multifunctional opportunity for a motivated positive thinking person. Gender; age; ethnicity; sexual orientation and disability are irrelevant, quite the contrary: we support diversity & multidisciplinary.

We offer an annual salary of € 40.000 and guarantee overpayment for professional experience or above-average qualifications.

If you are looking for challenges in a young, dynamic and international team, please send us your meaningful application:
