

VelaLabs is an innovative international analytical service provider for the pharma- and biotech-industry with a focus on development and characterization of Biologics, Biopharmaceuticals and Biosimilars.

We are looking for an employee to reinforce our team: **Lab Technician**
Focus: **Cell Culture; Bioassay**

Responsibilities:

- Support planning & evaluating experiments
- Performance of cell-based assays
- Support technical feasibility studies for new projects
- Review of reports / plans / lab journals
- Training of other team members
- Support and performance of troubleshooting / change control / deviations / validations / risk analysis

Requirements:

- Practical expertise in cell culture cultivation (Freezing, thawing, sub-cultivation of adherent and suspension cells)
- Practical expertise in cell-based assays (Proliferation assays, etc)
- Enjoys fast-paced diverse scientific work
- Self-organized, open minded
- Positive attitude
- English and German, spoken and written

Bonus:

- GMP experience
- Data evaluation / statistics skills

What you can expect:

- Diverse creative environment and problem solving atmosphere with a highly motivated team of junior staff.
- Flexible working time in laboratories, equipped with state of the art analysis instruments.
- Parking place in front of the company.

We provide an interesting and multifunctional opportunity for a motivated, positive thinking person
Gender; age; ethnicity; sexual orientation and disability are irrelevant, quite the contrary: we support diversity and multidisciplinary.

If you are looking for challenges in a young, dynamic and international team, please send us your meaningful application:
