

Research Scientist (m/f/d) - Full-time

Origimm Biotechnology GmbH is an international early-stage biotech company located in **Vienna** with a dedicated and highly motivated small team. We strive to improve the quality of life of patients by developing highly innovative products for prevention and treatment of diseases associated with skin-colonizing microbes. We stand for innovation and honesty and always demand the highest standards from ourselves and our products out of respect for the patients.

To enable our small and personable R&D team to concentrate on their core activities, we are looking for a full-time **Research Scientist (m/f/d)** with experience in skin research and *in vitro* cellular assays. The employee will be assigned to develop, optimize, validate and perform immunological, biochemical and bacteriological assays for antigen discovery and drug development programs, preclinical and clinical research. We are seeking the best in their profession to match our high standards, and in return, we provide a motivating and supportive work environment.

We offer

- Professional and pleasant working atmosphere
- Work surrounding fostering individual creativity
- Working conditions under highest ethical standards and concern for human health
- Highly innovative scientific work environment based on mutual trust and support
- Very engaging, responsible and diversified position
- Amenities and specifics of a small early-stage company
- Flexible working hours

Responsibilities

- Performance, analysis and documentation of test procedures (e.g. ELISA, flow cytometry, functional immunological assays, cell culture, various microbiological methods)
- Deliver novel *in vitro* models, assays, and discovery work using ex vivo human skin, 3D skin equivalents and primary skin cells
- Application, maintenance and update of standard operating procedures (SOPs)
- Performance of GxP compliant activities and documentation
- Work in BSL2 environment in compliance with respective regulations

Qualifications and Professional Background

- MSc or PhD in Biology, Cell/Molecular Biology or related field
- At least 5 years of practical experience as Research Scientist
- Experienced Scientist with passion for performing hands-on lab work

- Hands on experience with immunological, biochemical and microbiological assays including flow cytometry, ELISA and fluorescence microscopy
- Knowledge of Dermatology and/or Skin Biology
- Hands on experience with human skin cell/tissue culture (keratinocytes, fibroblasts, skin equivalents and explants)
- Experience with bacterial cell culture and biofilm assays is an advantage
- Experience with GxP compliant working methods and documentation
- Experience within the pharmaceutical industry is beneficial
- Ability to work independently and pro-actively in problem solving
- A strong team player with adaptable and flexible personality
- Communicative personality with strong social skills
- Highly reliable, responsible and curious personality who is open to learn and develop new skills
- Good command of MS Office applications
- High command of English is required, German knowledge is a plus

The minimum salary we offer for this position is € 3.000,- gross per month for full-time. The actual salary will depend on relevant experience and qualification of the designated candidate and will be negotiated at the time of the job offer. We explicitly encourage female candidates to apply for this position.

Does our description meet your expectations concerning your next career step? Then please send us your CV plus an informative motivation letter and convince us that you are the best candidate for this position. We are looking forward to receiving your application at recruiting@origimm.com.
